

# GAS PERMEABLE

Our gas permeable materials offer a wide range of properties suited to all modalities

## **OPTIMUM INFINITE**

- Hyper oxygen permeability - 180 Dk
- Resistant to flexure
- Scratch resistant
- Excellent surface wettability
- Suitable for all modalities but designed for scleral and ortho-k lenses

## **OPTIMUM EXTRA**

- High oxygen permeability - 100 Dk
- Excellent surface wettability
- Suitable for all modalities

## **F2**

- Available in a range of oxygen permeabilities:
  - Low (11 Dk)
  - Mid (33 Dk)
  - High (42 Dk)

## **OPTIMUM EXTREME**

- High oxygen permeability - 125 Dk
- Excellent surface wettability
- Suitable for all modalities

## **OPTIMUM COMFORT**

- Mid oxygen permeability - 65 Dk
- Excellent surface wettability
- Ideal for corneal, toric and multifocal lenses

## **HEXA100**

- High oxygen permeability - 100 Dk
- Hexafocon A material
- Suitable for all modalities
