

Ophtecs

Ophtecs Head Office and R & D Center, Kobe, Japan

Since our establishment in 1981, Ophtecs has been committed to developing, manufacturing and marketing innovative ophthalmic products. Our primary objective is to establish ourselves as a leading global eye care company. While our core business revolves around contact lens care products, every member of our team is dedicated to expanding our presence within the broader eye care industry.

Over the years, we have achieved notable milestones. In 2015, we introduced **cleadew**, a contact lens care brand that has experienced steady growth and is now poised for expansion to more markets. Our product offerings are characterized by their unique features and emphasis on quality, safety and comfort. While introducing new and distinctive products presents its challenges, we remain steadfast in our belief that customers deserve only the best for their eyes.

Ophtecs Factory, Japan

Ophtecs Europe BV, Netherlands

We continue to actively pursue overseas expansion by targeting markets in Asia, Europe and the United States. In late 2018, we took a significant step towards achieving this goal by acquiring a contact lens manufacturing company in the Netherlands, which now serves as our European base.

Our unique **cleadew** Advanced Care System utilizes povidone iodine, renowned for its high efficacy against a broad spectrum of microorganisms including acanthamoeba. **Cleadew** is an innovative care solution system formulated with proteolytic enzymes and a surfactant to effectively remove lipid and protein deposits. It also pioneers the world's first all-in-one contact lens solution integrating the powerful combination of PHMB and alexidine.

Incorporation of a hyaluronic acid derivative developed in our research facilities, we are enhancing wettability on a daily basis, thereby significantly elevating contact lens comfort. Our goal is to continue being at the forefront of innovation in the industry.

Based in the Hyogo Prefecture of Japan, our headquarters are in Kobe City. Our manufacturing facility is in the more rural Toyooka City where we contribute to local economies and community development. We envision ourselves as a company that not only competes globally but also contributes locally. As we continue our mission to enhance global ophthalmic care, we encourage you to become familiar with our lens care products and lenses. Stay tuned for upcoming developments from Ophtecs!

cleadew

ADVANCED CARE SYSTEM

Unique features of the cleadew advanced care system:

-  Utilization of povidone iodine, renowned for its high efficacy against a broad spectrum of microorganisms and acanthamoeba.
-  Innovative care solution formulated with proteolytic enzymes and surfactants, designed to effectively remove lipid and protein deposits.
-  Pioneering the world's first all-in-one contact lens solution, integrating the powerful combination of PHMB and alexidine.
-  Incorporation of SMD technology, enhancing wettability on a daily basis, thereby significantly elevating the comfort of wearing contact lenses.

OphTECS cleadew contact lens care solution

Care system for rigid oxygen-permeable contact lenses (optimal for ortho-K)

- Disinfection, cleaning, rinsing, storage
- Proteolytic enzymes and surfactants remove lipid and protein deposits
- Povidone iodine is highly effective against microorganisms and acanthamoeba
- Optimal cleaning without rubbing the contact lenses and easy to use, disinfection completed after 4 hours
- Package contains cleaning solution, neutralizing tablets, rinsing solution* and a contact lens case
- Available in:
 - cleadew GP 40ml & cleadew GP 120ml
 - cleadew GP 40ml + *Care Solution 120ml
 - cleadew GP 120ml + *Care Solution 120ml

All-in-one solution for rigid oxygen-permeable contact lenses

- Disinfection, cleaning, rinsing, storage
- Improved wettability thanks to innovative SMD technology
- Greater wearing comfort thanks to the accumulation of hyaluronic acid derivatives (HAD) on the contact lens surface
- Perfect balance between disinfection and safety for the eye
- Package includes all-in-one solution and a contact lens case
- Available in 60ml & 360ml

Care system for scleral contact lenses

- Disinfection, cleaning, rinsing, storage
- Proteolytic enzymes and surfactants remove lipid and protein deposits
- Povidone iodine is highly effective against microorganisms and acanthamoeba
- Optimal cleaning without having to rub the contact lenses
- Easy to use, disinfection completed after 4 hours
- Package contains cleaning solution, neutralizing tablets, rinsing solution* and a large format contact lens case
- Available in:
 - cleadew SL 100ml & cleadew SL 300ml
 - cleadew SL 100ml + *Care Solution 120ml
 - cleadew SL 300ml + *Care Solution 360ml

Rinsing and insertion solution in ampoules for scleral contact lenses

- Specially designed for rinsing and inserting scleral lenses
- Added sodium hyaluronate increases wearing comfort and enables a longer wearing time
- Thanks to the hypromellose, the contact lens is easier to insert and the risk of air bubbles is reduced
- Preservative-free
- Package contains 30 ampoules of 8ml

Ophtecs cleadew contact lens care solution

Care system for soft contact lenses

- Disinfection, cleaning, rinsing, storage
- Proteolytic enzymes and surfactants remove fat and protein deposits
- Povidone iodine is highly effective against microorganisms and acanthamoeba
- Easy to use without rubbing lens, disinfects within 4 hours
- Package contains cleaning and rinsing solution, disinfection and neutralization tablets and a contact lens case
- Available in 128ml & 385ml

All-in-one solution for soft contact lenses

- Disinfection, cleaning, rinsing, storage
- World's first all-in-one contact lens solution with a combination of PHMB and alexidine
- Highly effective against microorganisms and acanthamoeba, reduces the risk of eye infections
- Improved wettability thanks to innovative SMD technology
- Increased wearing comfort thanks to the accumulation of hyaluronic acid derivatives (HAD) on the contact lens surface
- Package includes all-in-one solution and a contact lens case
- Available in 60ml & 360ml

Rinsing solution for all rigid oxygen-permeable contact lenses

- The perfect rinsing solution for hard oxygen permeable contact lenses.
- Designed to work seamlessly with other cleadew lens care products and provides a hassle-free and reliable lens care routine.
- Promotes optimal eye health with its gentle yet effective formula.
- Cleadew CareSolution provides a simple approach to achieve and maintain clean and hygienic contact lenses.
- Available in 360ml
